31-March-2020

Dear Sir Simon Stevens,

Regarding our recent conversations pursuant to the BRC's results from COVID19-445 the board must not ignore the implications and therefore you are hereby authorised to proceed notifying the applicable and concerning government departments. The board has determined that an immediate injunction for the halt of 5G telecommunication structures is required which will be forged through government protocol.

General and specific record restrictions will apply to this information and any statements made will be rigorously examined before submission into the National Archives as well as government archives except where authorised.

Government access to the BRC's results is also restricted to persons with appropriate clearance as significant risk assessment has determined COVID 19-445 is of paramount political and public interest, any on going communication between departments of this nature is hereby terminated immediately.

Notwithstanding the profound implications of these findings, we are obliged to forward these results to The Rt Hon Ben Wallace Secretary of State for Defence.

Yours sincerely,

Dr John Bradley
